

Jellyfish Information

Thank you for your interest in my Jellyfish sculpture. The Jellyfish series is a collection of one-of-a-kind sculptures individually hand-crafted with blown glass bodies and neon tentacles. Their size varies from 12"-16" at the widest diameter and 30"-36" in overall height.

The Jellyfish are designed to be suspended by a fine, clear acrylic-coated stainless steel cable which can be provided in any length. They are illuminated entirely by neon, with the neon transformer enclosed within the glass body. The transformer is powered by a 12volt AC adaptor which plugs into any standard 110 volt electrical outlet and connects to the Jellyfish via a 12 volt DC quick disconnect. A 12 volt extension cord is also supplied. Power supplies are also available to match overseas voltage requirements.

All electrical components as well as the neon tubes come with a one year warranty against failure. Our experience with the neon transformers has been excellent with only rare failures. In addition, they perform quietly with no hum or buzz and will not interfere with telephones, radio or television.

The Jellyfish are professionally packaged for shipping and are double-boxed. Shipping is available worldwide. The neon tentacles are shipped separately from the bodies to reduce breakage. They are easily reassembled with no tools required and easy-to-follow instructions are provided. In the event of breakage of the neon tentacles, they can be easily replaced. Each Jellyfish is individually numbered and records are kept of each Jellyfish so that matching replacements can be provided.

The Jellyfish sculptures are essentially maintenance-free requiring only occasional dusting. Their luminous quality enhances any environment in an exciting and uniquely beautiful display. Designed to remain on at all times, the Jellyfish can be anticipated to provide years of trouble-free enjoyment.

Please note:

The Jellyfish and additional work can be seen on my web site: www.Ehlenberger.com
